—wherein the non-volatile memory further comprises a control circuit,  
wherein the control circuit is adapted to adjust either the first or  
second read circuits in response to the memory test circuit --

B. Cancel claim 15.

C. Cancel claim 16-21.

3. This office acknowledges receipt of the following item from the Applicant:

Prior art also does not teach a system comprising in combination with other features, a memory test circuit, a first and second read paths associated with first and second read circuit; a switch circuitry, wherein the switch circuitry is adapted to select the first or second read circuits and coupled to the memory test circuit via external data connections, a control circuit, wherein the control circuit is adapted to adjust either the first or second read circuits in response to the memory test circuit.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
